

The Sun

Simon Roberts

Verse 1

It's just one of a billion stars,
So much closer to Earth than the others.
It's our bringer of light,
It's the giver of all our life.
So much more than a ball of flames,
It provides us with warmth in the summer.
Whether insect or plant,
Or a great elephant,
It's the reason we all survive.

Chorus

Because we are living,
Because we all live beneath the Sun,
Because we are living,
It shows us a new day has begun.
It shows we are living,
That we are all here beneath the Sun,
Forever we're living,
We'll show you a new day has just begun.

Verse 2

It's the Sun that can keep us green,
Solar power is one of the answers.
We can harness the rays,
To keep school warm for all our days.
Heating water and cooking food,
Charging batt'ries and i-pods together,
There are so many ways,
For the Sun to help with its rays.

Chorus

Because we are living,
Because we all live beneath the Sun,
Because we are living,
It shows us a new day has begun.
It shows we are living,
It shows we all live beneath the Sun,
Forever we're living,
We'll show you a new day has just begun.
